>>> hello  
Hello! It's nice to meet you. Is there something I can help you with or would you like to chat?  
  
>>> my pc charger is not charging properly my pc  
I see. Sorry to hear that your PC charger is not working properly. Can you please provide more details about the issue you're experiencing? For example, does the charger light not turn on when you plug it in, or is the battery not charging at all? Additionally, have you tried using a different charger or power source to see if the issue persists? Any information you can provide will help me better understand the problem and potentially offer a solution.  
  
>>> /bye
